Experience and expertise in vacuum and compressed air technology

Individualised support for customised systems and products.

Markus Britsche

Michael Wagner

Stronger together

Together, we have over 30 years of experience in leading positions in the industry. We founded briwatec GmbH in 2006 because of the advantages to be gained from our many years experience and knowledge — Markus Britsche offers expertise in technology (development, design, production, assembly and systems engineering) and Michael Wagner in customer support (sales, marketing and service).

Our team also comprises highly qualified experts with an advanced background in the area of industrial vacuum technology. Engaging in a constructive dialogue with both our employees and partners is of critical importance to us. Proactive collaboration and reliable, economical processes are the keys to achieving optimal results.

Successful as a team

Systems and products

KORUND

Full systems solutions

From vacuum pump sets all the way up to highly complex vacuum stations with control centres. In providing vacuum systems, we make sure to develop independent and energy-saving smart cabinet designs. We offer you a full range of customised systems.

ZIRKON

Dry-running rotary vane vacuum pumps and compressors

- Suction capacities of 5 to 140 m³/h
- Ultimate vacuum 120 mbar (abs.)
- Alternative
- Max. pressure difference + 1.3 bar

TOPAS

Oil-lubricated rotary vane vacuum pumps

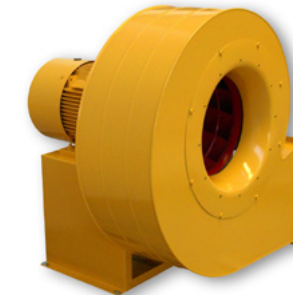

- Suction capacities of 4 to 600 m³/h
- Ultimate vacuum 0.1 mbar (abs.)

RUBIN

Side channel blowers

- Flow rates of 40 to 2,200 m³/h
- Max. differential pressures of up to +/- 500 mbar

OPAL

Radial blowers and fans

- Flow rates of 300 to 17,000 m³/h
- Max. differential pressures of up to +/- 180 mbar

SAPHIR

Claw vacuum pumps

- Suction capacities of 100 to 300 m³/h
- Ultimate vacuum 60 mbar (abs.)

PERIDOT

Rotary lobe vacuum pumps and compressors

- Suction capacities of 300 to 4,000 m³/h
- Max. differential pressure of up to -0.8 / + 1 bar

ACCESSORIES

We offer a wide range of accessories for vacuum- and compressed air technology

Individualised support

Tell us about your application. We offer support starting from the planning stages of new applications and work together with you to develop a customised solution which is suited to your needs. What's more, we provide you with sample products for testing and take measurements and conduct trials either at our own facilities or yours.

We also place great value on flexibility and quick response times. Our well-structured warehouse makes this happen.

To round out our services, we offer assistance in commissioning, preventative maintenance work, general overhaul and in making repairs to the system's major components, and we are prepared to do so in our factory or at your operation site.

Please contact us, we would be happy to advise you:
